

2015-2016 Susteen International Outreach Mobile Forensics Grant (SIOMF)

All Departments Can Apply

Grant Background: This grant is set up for law enforcement agencies outside the United States, to acquire much needed Mobile Forensics Software for their departments. Law enforcement agencies are having trouble keeping up with increasing amounts of cases involving cell phone data. Agencies have to ship cell phones to outside sources for their mobile forensic needs. This is time consuming and can lead to a loss of data or legal precedence. The Susteen International Outreach Mobile Forensics Grant allows law enforcement agencies the ability to acquire their own mobile forensic software at steeply discounted prices using matching funds. Agencies can now obtain multiple licenses on the grant.

Need:

- Qualified Agency shall have a need for mobile forensic software (cell phones, tablets)
- Agency should have one employee who can attend a webinar (at no cost) on proper software usage.
- This grant is now open to all Law enforcement agencies (certain restrictions will apply)

Description of Project:

- **Goals:** The Susteen International Outreach Mobile Forensic Grant should be used by law enforcement agencies to help better build cases and increase conviction rates. This should be a benefit to the community that they serve.
- **Objectives:** The grant's objective is to allow smaller law enforcement agencies to have the same quick access to the mobile forensic tools used by larger departments with greater budgets. Susteen aims to combat growing terror menaces by allowing agencies outside the United States to acquire advanced mobile forensic software cheaply.
- **Process:** Return application below and allocate matching funds. Grants are available on an immediate needs basis. **Grant is non-competitive as it is first come, first serve.**
- **Outcome:** This grant aims to allow **up to 500** agencies the ability to obtain mobile-forensic software at a steeply discounted rate.

Description of the Product and What is Included:

- **Secure View 4:** The "go to" software for the cell phone forensic investigator. Secure View 4 supports over 13,000 phones, tablets and devices. Secure View is the only mobile forensic tool that provides 3 specific processes for examination: Acquire, Analyze, and Report. *Phones differ in regions. Secure View is set up to easily acquire data from Android and iOS devices in most locations.
 - **Add-on Modules:** Deleted Data Recovery from targeted Android Smartphones. Intelligence Gathering tool for pre-set field triage. Password Acquisition Tool to unlock CDMA cell phones *with a qualcomm chip set. Advanced Analytics. **New for 2015: svDetect** early warning system **and svConnect** feature for advanced support for data gathering.
 - SIOMF Grant does NOT include pincode/passcode breaking software but you may purchase the SV Strike for a discounted price. See included flyer for details.

Or via Email to: grants@susteen.com www.secureview.us Call us at 949.341.0007

Budget:

Susteen understands that federal funds have become harder to receive. Departments do not have the average \$7,500-\$15,500 needed to purchase an all-inclusive mobile forensic software suite. Nor do they have the time or resources to drive to other jurisdictions for help in acquiring cell phone data. This grant drastically cuts down the cost of acquiring Secure View 3; currently in use by the USSS, FBI, ICE and various other Law Enforcement agencies.

Item	MSRP	Grant Pays	Cost Per License to Law Enforcement Agency	Amount of licenses needed *Max 5
Secure View 4 Mobile Forensic Software with Add-ons	\$6,395	\$4,400	\$1,995	

*Mark desired # of licenses

Work plan/Timeline:

- All applications for the Susteen Community Outreach Mobile Forensic Grant must be received prior to 2/15/2016 and agency funds must be received by 4/28/16.
- Grant is non-competitive and is issued on a first come first serve basis for **no more than 500** law enforcement agencies throughout Europe, Middle East and Asia.

Application may be returned via email or mail: Approval process takes less than a week.

Name: _____

Organization: _____

Address: _____

City: _____ St. _____ Zip: _____

Phone: _____

E-mail: _____

Amount of Sworn Full Time Officers: _____

Current Mobile Forensic Software in Use (if none, mark N/A): _____

Est. Volume of Phone Extractions per Month: _____
